Ohio Railway Association Information

Ohio Residential Broadband Expansion Grant Program funded applications that require access to railroad property, including public at-grade crossings, must gain approval for access from the railroad property owner. The Ohio Railway Association has provided information to assist and streamline the process for Ohio Residential Broadband Expansion Grant Program grant recipients. The Ohio Railway Association has assembled a list of permitting contacts for each of Ohio's freight railroads. The list is available at www.ohiorailroadassociation.com.

For additional information please contact the Ohio Railway Association at (614) 224-4010 or ora@ohiorailroadassociation.com.
