Broadband data displayed on this map are developed from a combination of direct provider outreach and data collection, FCC Form 477 broadband data, and Connected Nation's extensive national and state-level data collection efforts. Connected Nation Ohio, a broadband service provider, was unable to supply granular data and a detailed service area could not be developed. The provider's service availability is represented by FCC Form 477 data, a format which tends to be overstated. This map is not a guarantee of internet service availability. Mobile and satellite services may also be available. The current FCC definition of broadband is a minimum of 25 Mbps (Megabits per second) download and 3 Mbps upload.
